active cancelling technology  
**vibrafree™**

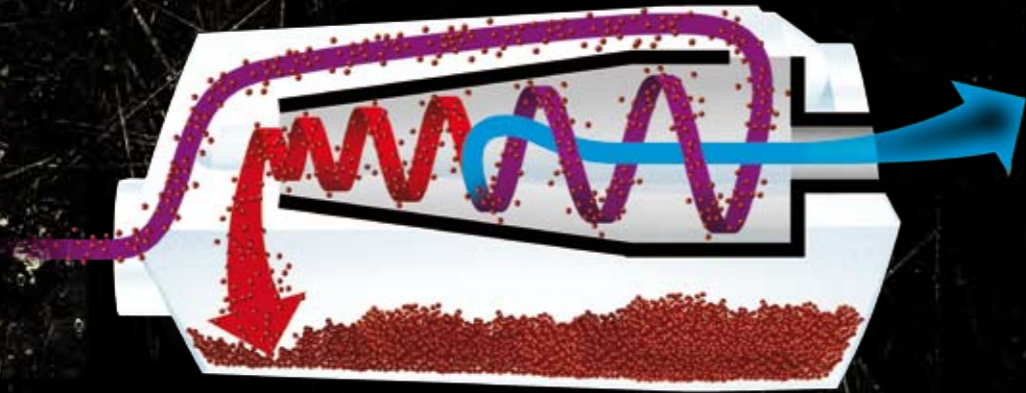

**S**lower is not always safer... What may be true for driving a car, can be the opposite when it comes to working with a Worx VibraFree sander. VibraFree dramatically increases your productivity, up to 100%, while keeping feedback vibration extremely low. How is it possible? VibraFree Active Canceling Technology recycles feedback vibration back to the work piece rather than to your hand and at the same time maximizes the power that goes into sanding.

# Our new sander is a breath of fresh air

Unlike conventional filters that try to trap dust inside a bag, Worx Cyclonic Dust Separator effectively separates dust from the air. While normal dust filters suffer from loss of suction as they clog with use, suction remains constant with Worx CDS. As an additional benefit, the air expelled from the CDS system is cleaner for a healthier work environment.

No more replacing paper bags or emptying cloth bags... getting rid of dust is as easy as the click of a button.

# Who says a tool has to stay the same forever?

**W**ork Revolver is the first and only line of power tools that adapt themselves to fit your body rather than requesting your body to adapt to fit the tool. Thanks to its revolutionary handle adjustment, there's virtually no task a Revolver power tool cannot manage while ensuring extra comfort, efficient transmission of your force and maximum control.

**REVOLVER**<sup>™</sup>  
Still power tools, just reinvented

### Quick and strong

The Revolver handle is set in a second. Its locking mechanism performs like new after thousands of settings

### Efficiency and comfort in every position

Revolver tools are designed to adapt themselves to the job, rather than forcing your body to bend, flex and stretch

### 45°

Your wrist and arm are comfortable even in overhead drilling

### 0°

Revolver ensures the best distribution of your force in every working position

### 35°

Apply your force along the bit axis even when drilling in a low down position, without having to bend or kneel

### Heavy-duty carry case

The Worx case is robust and designed for the toughest workplaces

# Reach places you never could before

**N**eed to make that cutout underneath a kitchen sink but there's very little clearance? No sweat. The new Worx Contour jigsaw can take you to places where other jigsaws simply can't. And it's not just about getting into tight places. The Contour also sports a lower center of gravity and a grip design that feels natural in your hand. This means you have better control and maneuverability in any application, tight spot or not.
